

ZURI INTERNSHIP PROGRAM

I write to apply for a position in the zuri <https://internship.zuri.team> internship 2021 program. I have a genuine interest in learning as much as possible in about a career in technology world. I applied to learn and become a Front-end programmer.

Who is a “front-end web developer / Web developer or front-end programmer”. A front-end programmer is responsible for implementing visual and interactive elements that users engage with through a web browser when using a web application. Front-end Web development is the graphical user interface of a website, through the use of HTML, CSS and JavaScript, so that users can view and interact with that website.

As an intending front-end developer, I have set my goals for the course of the program, which to be able to use these tools HTML, CSS, SASS and JavaScript effectively, view and do any task before me as a positive learning experience.

My primary goal is beginning a career in front-end programming, to acquire as much experience as possible and not only hope to deepen my knowledge on front-end programming but i would also hope to acquire some of the practical skills that i will need to be better equipped in this field.

I would hope that this internship would provide an opportunity to build a working relationship with leaders in the field from whom I could gain valuable knowledge. I am certain that any experience from this internship would prove to be indispensable to me in accomplishing my future goals.

Thanks,

Oluwafemi Akinyele.
